PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of professional experience building web applications with the MERN stack and NestJS/Next.js. I design REST APIs, tune PostgreSQL and MongoDB schemas, and ship features end to end in Agile teams. Most recently I built a dental SaaS platform at Media Nv covering EMR integration, appointment management, and payments.

TECHNICAL SKILLS

Backend:	Node.js, Express.js, NestJS, RESTful APIs, Socket.IO, JWT, bcrypt, FastAPI
Frontend:	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
AI / LLM:	Google Gemini API, RAG (Retrieval-Augmented Generation)
Databases:	PostgreSQL, MySQL, MongoDB, Vector databases
Cloud & DevOps:	AWS (EC2, RDS, S3), Netlify, Render, Git, GitHub
CS Concepts:	Data Structures & Algorithms, Object-Oriented Programming, System Design
Languages:	TypeScript, JavaScript, Java, Python

PROFESSIONAL EXPERIENCE

Associate Full Stack Engineer
Dec 2025 – July 2026

Media Nv | Ahmedabad, Gujarat

- Spearheaded development of scalable full-stack applications using TypeScript, NestJS, and Next.js, collaborating with cross-functional teams to deliver optimized, production-ready features.
- Architected RESTful APIs and high-performance backend systems with NestJS guards, interceptors, and custom decorators ensuring security and separation of concerns.
- Designed and optimized PostgreSQL database schemas for high-traffic scenarios, improving query performance through efficient indexing and relational modeling.
- Led end-to-end development of a dental SaaS platform integrating EMR connectivity, appointment scheduling, automated reminders, payment processing, CWP, and digital forms.
- Participated in Agile/Scrum sprints including code reviews, sprint planning, and technical design discussions.

Freelance Full Stack Instructor
Jan 2024 – Nov 2024

Technoglobe | Lucknow, UP (Remote)

- Mentored 20+ students through the complete full-stack development lifecycle — from requirements gathering and API design to database modeling and live deployment.
- Delivered hands-on curriculum covering Node.js, Express.js, JWT-based authentication, CRUD APIs, data validation, MySQL, and MongoDB.
- Guided multiple students to deploy production applications, significantly improving job-readiness and real-world development skills.
- Provided structured code reviews and architecture feedback, promoting best practices in clean code, scalability, and performance optimization.

Freelance Subject Matter Expert – Computer Science
Jul 2022 – Nov 2022

Chegg | Remote

- Delivered expert solutions across DSA, OOP, and web development topics, achieving a 90%+ client satisfaction rate.

KEY PROJECTS

SkillSwap – Peer-to-Peer Skill Exchange Platform | Live | GitHub

Node.js · Express.js · React 19 · Vite · MongoDB Atlas · Socket.IO · Google Gemini (RAG) · JWT · Tailwind CSS

- Built a full-stack platform where users list skills and swap them through a credit system. The Node.js/Express backend has 7+ route modules (users, skills, transactions, chats, messages, notifications, AI); the frontend is a React 19 single-page app on Vite.
- Added a RAG pipeline on Google Gemini: it pulls live skill listings from MongoDB, ranks them as context, and passes them into the prompt to produce match scores, swap recommendations, and learning roadmaps.

- Shipped four Gemini 1.5 Flash features: a natural-language skill matcher with scored results, a tool that rewrites rough skill descriptions into clean listings, a multi-week swap roadmap generator, and a coaching chatbot.
- Implemented real-time chat and notifications with Socket.IO. Notifications fire on new messages, transaction requests, accepts, and rejects, and update a live badge in the UI.
- Handled auth with JWT in httpOnly cookies, bcrypt password hashing, protected-route middleware, and CORS origin allowlists for multiple environments.
- Built the credit transaction flow (Pending → Accepted/Rejected → Completed) with atomic debit and credit, and a notification to both users on every state change.
- Deployed the frontend on Netlify and the backend on Render, with MongoDB Atlas as the database.

Dental Management Platform – Production SaaS

NestJS · PostgreSQL · Next.js · TypeScript

- Developed a production-grade multi-module dental SaaS with EMR integration, appointment management, payment processing, patient reminders, and configurable digital forms.
- Implemented modular NestJS architecture — guards, interceptors, and decorators — ensuring security, maintainability, and scalability.

EDUCATION

Bachelor of Technology – Electronics & Instrumentation Engineering
KIIT University, Bhubaneswar, Odisha
